ABOUT

I am a Computer Engineering graduate from Universidad Pontificia de Salamanca and an MSc graduate in Artificial Intelligence from the University of Amsterdam. My primary interests lie in **machine learning** and **deep generative modeling**, where I explore techniques for building expressive, data-driven representations and learning generative models capable of structured synthesis and sampling, particularly at the intersection of geometric deep learning and diffusion/flow models. I am proficient in Python and PyTorch and have applied these tools to build and evaluate models for real-world problems. Outgoing and highly social, I served as both class and faculty representative throughout my bachelor's, honing leadership and teamwork skills.

RESEARCH

2026 

Kernel-Gradient Drifting Models

Maria Esteban Casadevall*, **Jorge Carrasco Pollo***, Max Welling, Jan-Willem van de Meent, Floor Eijkelboom

2026 

Pawsterior: Variational Flow Matching for Structured Simulation-Based Inference

Jorge Carrasco Pollo*, Floor Eijkelboom*, Jan-Willem van de Meent

2025 

Symmetry-Aware Graph Metanetwork Autoencoders: Model Merging through Parameter Canonicalization

Odysseas Boufalas*, **Jorge Carrasco Pollo***, Joshua Rosenthal*, Eduardo Terres Caballero*, Alejandro García Castellanos

2025 

[Re] Benchmarking LLM Capabilities in Negotiation through Scoreable Games

Jorge Carrasco Pollo, Ioannis Kapetangeorgis, Joshua Rosenthal, John Hua Yao

EXPERIENCE

University of Amsterdam

2025 – 2026

Research Intern · UvA–Bosch–DELTALab

Applied Variational Flow Matching to Simulation-Based Inference, incorporating physical symmetry constraints via Geometric Deep Learning to achieve state-of-the-art performance. Supervised by Floor Eijkelboom and Jan-Willem van de Meent; the work led to a publication at ICLR 2026.

University of Amsterdam

2025 – 2026

Digital Expertise Teaching Assistant

Delivered seminars on Machine Learning and Data Science topics to undergraduate students, ranging from Linear Regression to Large Language Model training. Developed course materials and provided technical support, building pedagogical skills to explain complex concepts across varying levels of expertise.

Universidad Pontificia de Salamanca

2023 – 2024

Assistant Researcher Intern

Built an end-to-end analysis and visualization tool aggregating large-scale data across worldwide Profuturo Education Platform projects, enabling management and educators to make principled, data-driven decisions. Applied Machine Learning and Data Science techniques throughout, in collaboration with the Telefonica Chair.

Meaningful Data

2022 – 2023

Junior Software Developer

Independently built an end-to-end Information Retrieval and NLP pipeline to extract, process, and restructure information from judicial documents, fully automating a previously manual workflow. Delivered a production-ready product that significantly reduced effort in notary offices.

EDUCATION

University of Amsterdam

2024 – 2026

MSc Artificial Intelligence

GPA **8.7 / 10 (cum laude)** · Thesis **9 / 10**: *Kernel-Gradient Drifting for Structure-Aware Generative Modeling*. Coursework: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Geometric Deep Learning, Flow & Diffusion Models, Deep Probabilistic Modeling, Reinforcement Learning, Information Retrieval, Information Theory, Causality.

Universidad Pontificia de Salamanca2020 – 2024

BEng Computer Science Engineering

GPA 9.2 / 10 · Thesis 10 / 10 · First Class. Exchange year at the University of Maribor, Slovenia. Class & Faculty Representative; Member of the Student Council. Coursework: Machine Learning, Statistics, Data Science, Data Structures & Algorithms, Software Engineering, Databases (SQL, MongoDB, PostgreSQL, GraphQL), Operating Systems, Theoretical Computer Science, Programming (Python, C/C++, Java, PHP).

Kumon Mathematics Academy2008 – 2019

Self-study mathematics programme

First to complete the programme in the region of Castilla y León, Spain. Topics: Algebra, Geometry, Trigonometry, Calculus, and Differential Equations.

AWARDS

- ★ **Excellence Award**, Universidad de Salamanca — awarded for ranking among the top 100 scorers in the university entrance examinations.
- ★ **TFG-TCUE Award** for BSc Thesis: *Implementing Artificial Intelligence in ProFuturo’s Digital Education Platform for Prediction, Analysis and Visualization of Complex Associations.*
- ★ **Travel Grant**, University of Amsterdam — awarded to present *Symmetry-Aware Graph Metanetwork Autoencoders* at TAG-DS 2025 in San Diego, CA.

SKILLS & INTERESTS

RESEARCH	Machine Learning	Deep Generative Modeling	Geometric Deep Learning	Diffusion / Flow Models		
	Drifting	Graph Neural Networks	Simulation-Based Inference
